1.0 Kg	0.040 G	0.060 G	0.080 G
2.0 Kg	0.080 G	0.120 G	0.160 G
3.0 Kg	0.120 G	0.180 G	0.240 G
4.0 kg	0.160 G	0.240 G	0.320 G
5.0 Kg	0.200G	0.300 G	0.400 G
6.0 Kg	0.240 G	0.360 G	0.480 G

N.B.: It is recommended to adjust the food to sustain the target body weight and health of the cat. If your cat is obese reduce the amount of food to be fed. (Remove all dry foods from your feeding plan). Feed a diet that is low in calories and you may further lower the calories by adding some vegetable pulp to the thawed- out food. Please note never starve your cat. Cats get fixated on the food they are fed. To totally transition cats from kibbles to raw can vary from 3 days to 9 months. You will have to exercise 99.9% patience and 1% effort from your cat when attempting to change your cat to a raw diet.
